Mr Foodie
Fruits 3rd Color

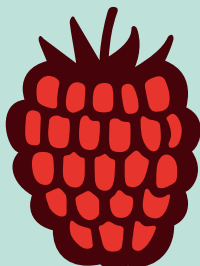

Choose your own colors. Combine three fonts from the group to have 3 color icon.

Some icons don't need 3 colors. In those cases, the glyph in **Mr Foodie Fruits 3rd Color** is empty.

Use regular Mr Foodie Fruits if you want 1 color icon. Do not use this style in multilayer combinations. Your icons will have a tiny, but visible cracks between colors. That's why we recommend using **Back** layer on the bottom when you want to build a colorful icon.

SEE THE LIST OF ALL GLYPHS BELOW IF:

- 1) you're not sure what represents particular icon
- 2) you want to know under what key you can find the icon you're looking for
- 3) you want to copy a character from the list because you have trouble typing it.
